

I am in support of a free internet under Net neutrality supported by Title II. Any action taken to inhibit this is un-American and un-Constitutional under the 1<sup>st</sup> Amendment guaranteeing Free Speech. If you give control of the internet – a public utility – to businesses, you are reducing the freedom of thoughts, ideas, and speech by putting it behind a pay wall where corporations decide what information you receive based on how much money you are able to pay. This restriction of free speech is unconstitutional and should not be allowed.
